

# Social Distancing Module

The **Social Distancing Module** provides an efficient and effective method for casino operators to adhere to the necessary safety measures required post COVID-19 by giving them two options to enable or disable machines and providing players the capability to reserve a time to play.

- **Dynamic Distancing:** With this feature, once a player cards in, all games in close proximity will be disabled.
- **EGM Scheduler:** Quickly upload a list of games that should remain enabled on the casino floor. The upload process can take place remotely, through the use of the Control EGM feature.
- **Resort Reserve and Game Reserve:** Provides the capability to reserve a time for players to be in the casino and also gives them an option to reserve their favorite game during their visit.
