

iVIEW™ 4 The Best Gets Better!

iVIEW 4, Bally Systems' next generation player interface, showcases flexibility across the spectrum for enhancing player experiences and facilitating customer service and employee duties. The iVIEW 4 interface displays dynamic marketing animations and video with instant response through a state-of-the-art multi-touch display.

iVIEW 4 DISPLAY

MONOPOLY ROULETTE

iVIEW 4 Advantages:

- 7x faster boot time and 10x more memory for games and content
- Modern, upgradeable operating system; supports Fast-Boot and HTML5, among other enhancements
- Supports up to 2 full-size displays for Display Manager
- Improved small display with multi-touch, auto-calibration, and brighter and wider viewing angles
- Web-based content provides improved content management by casino personnel and enhances cross-platform Omni-Channel, i.e., marketing content or bonus games on iVIEW, a player kiosk on iVIEW DM and mobile devices
- More hardware ports to support integration with external devices and improved software architecture for interfacing with third-party solutions
